The above-referenced application is the United States national phase of PCT Application No. PCT/AU2005/000160. Copies of the International Search Report (ISR) and the International Preliminary Report on Patentability (IPRP) are attached for the Examiner's convenience.

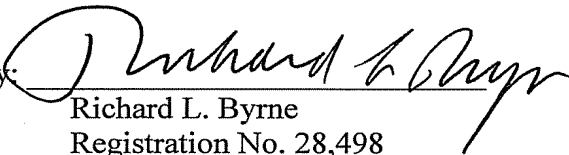

PCT Publication Nos. WO 01/34854 and WO 2004/096420, listed on Form PTO/SB/08a, are cited in the background art section of the specification on page 1. U.S. Patent No. 6,872,238 and U.S. Publication No. 2006/0256649, listed on Form PTO/SB/08a, are corresponding U.S. publications to WO 01/34854 and WO 2004/096420, respectively.

The ISR cites U.S. Patent Nos. 6,224,654, 5,626,651 and 3,883,324 and British Patent Application Publication No. 2087249, which are listed on Form PTO/SB/08a. It is noted that the prior art references identified in the ISR are all category A or state of the art references with respect to PCT claims 1-16. Further, it is noted that the IPRP states that PCT claims 1-32 meet the international criteria for patentability. Therefore, it is believed that pending claims 33-63, which are substantially similar to the PCT claims, are in condition for allowance.

Pursuant to 37 C.F.R. § 1.97(b)(3), no fee is believed to be due for the submission of this IDS, as it is being submitted before the mailing date of a first Office Action on the merits. Nevertheless, the Commissioner for Patents is hereby authorized to charge any fees which may be required to Deposit Account No. 23-0650.

Respectfully submitted,
